

BIBUS HOLDING

Network of expertise – partners for technology, materials and electronics

**We are a leading company
in our core activities
and offer our customers
high quality products
and services.**

**The keys to our success are
the network of expertise
and the skills of
our employees.**

Supporting Your Success

Together with our partners, managers and employees, we have continued to build on the foundation laid by Dipl. Ing. Hans Bibus in 1947 and already further expanded and developed by his son Felix Bibus.

From being exclusively a steel trader, without its own warehouse, the individual company has developed over the decades more and more in the direction of its current three business segments: technology, materials and electronics. The same core competencies are pursued in all three segments: engineering, logistics and services – to differing degrees depending on the business segment.

The value added that we produce for our customers, the tasks that we fulfil for our customers, has fundamentally changed over the decades, always focused on covering the perceived changing needs with appropriate services – internationally. International progress in the area of communications and the associated “general” knowledge of foreign procurement sources have triggered and promoted the first steps for further development, towards new, company-specific expertise. Pure steel trading was slowly replaced by the addition of new technological products requiring explanation or engineering. The step from the individual company to a corporate group was complete.

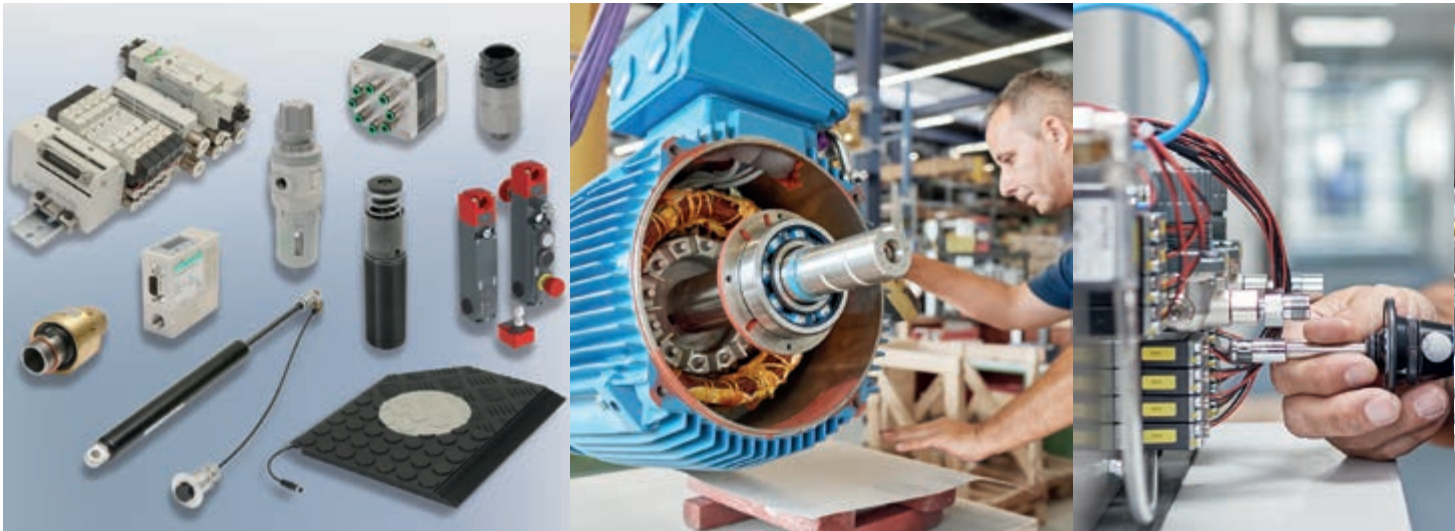

The Swiss market alone proved to be too small over the years of successful growth. The removal of borders in Europe promoted the strategy for growth beyond the borders of Switzerland and as far as Asia. The simultaneous internationalisation of the activities of our formerly exclusively Swiss customers and their support also at other locations supported its implementation. Care of existing customers and the acquisition of new customers and partners in new markets shape the activities of our subsidiaries also outside Switzerland: extend established, proven relationship and supplement with new one – on the side of the customer and on the side of the delivery partners.

The product range is not the same in each of the subsidiaries – but each one offers the same services as core competencies: engineering, logistics, services – and each of the companies has access to the know-how and resources of the whole group. For the customers, the delivery partners and for the employees, this is a concept which has led and will in the future lead to long-term, successful partnerships.

Christian Bibus

Conrad M. Ulrich-Bibus

Technology

Mechatronics and hydraulic technology for the machine and automotive industry

Over 70 years of experience

in the fields of hydraulics,

pneumatics, mechatronics

and system assemblies.

Core competencies in the

development and manufacture of

assemblies, hydraulic systems

and units as well as

in the development and

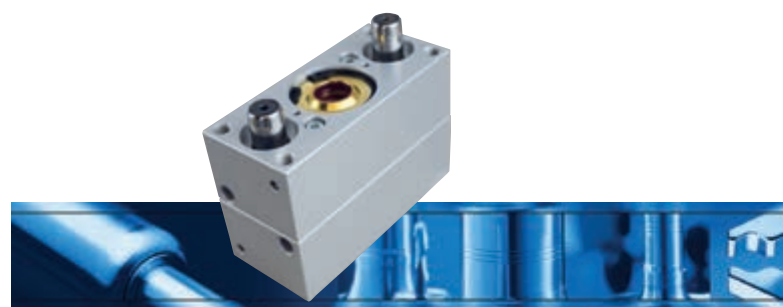

packaging of

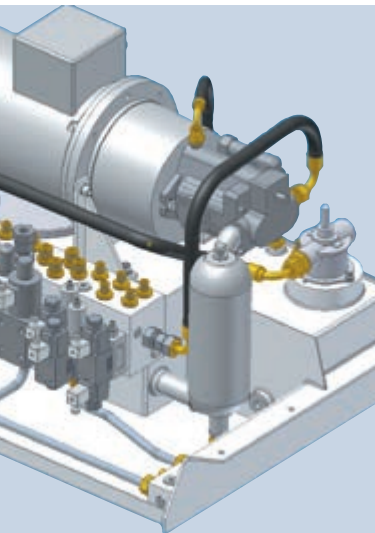

special components.

BIBUS AG and its subsidiaries as well as BIBUS HYDRAULIK AG and SAUER BIBUS GmbH are companies with more than 70 years of experience in the fields of pneumatics, mechatronics, electrical engineering/electronics, automation and hydraulics. They sell components of renowned manufacturers and produce systems. As technically qualified trading companies, they offer expert advice and deliver the right products of the required quality on the agreed delivery date at a fair market price.

The customer-centred in-house sales support and broad stock-keeping guarantee fast order processing. The companies of the BIBUS group in the technology segment are ideally equipped for the development and production as well as for the packaging of special components.

The technology segment has core competencies in custom plant and assembly construction – from the prototype to series production – as well as in the development and assembly of complete assemblies and drive systems for stationary and mobile applications. State-of-the-art test benches enable simulations, series and individual tests of components and complete systems.

**Pneumatics
Hydraulics**

Logistics
Hydraulic and pneumatic components from stock

Engineering
Planning, development, production and commissioning of hydraulic and pneumatic drive and control systems as well as plants. Development and production of special products, assembly of components, assembly construction

Service
Upkeep, service and repair of hydraulic products. Testing and inspection of components and complete systems, commissioning and training

Mechatronics

Motors, gears, controls, couplings, guideways and taper keys torque transmission from stock

Sensors and switches, safety technology and automation components

Design and assembly of electro-mechanical drives, manufacture of special products

Planning, design and construction of systems and plants for automation of processes, safety and monitoring systems

Maintenance, repair and service, spare parts management

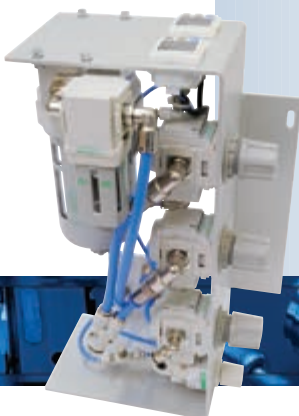

Maintenance, repair and service, spare parts management, packaging of components ready for assembly

Environmental technology

Feed pumps for liquid and gaseous media, accessories for waste water technology

Planning and development of systems and plants

Maintenance, repair and service, spare parts management

Materials

High quality materials for various areas of applications

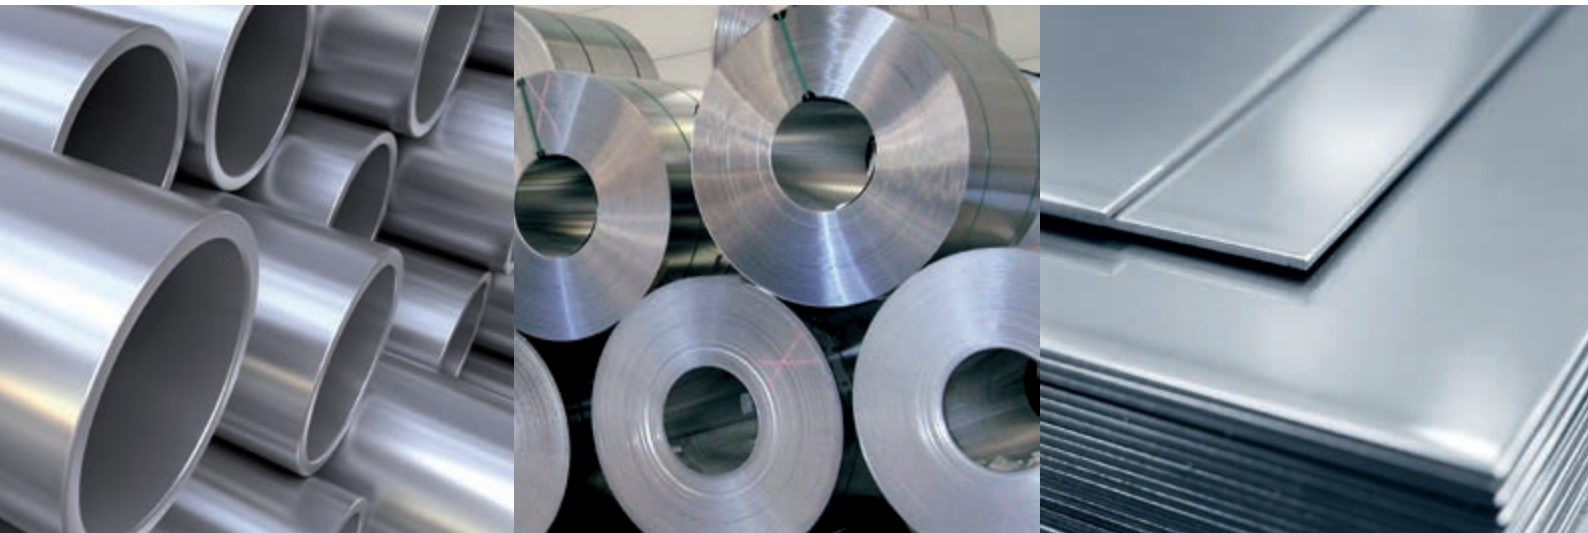

The cultivation of long-term partnerships with our customers and suppliers is the benchmark for our day-to-day work.

Over 150 employees in the Materials group are committed to meeting individual needs and providing reliable logistics solutions and services.

The BIBUS companies in the Materials group, SAUTER EDELSTAHL, S+D Spezialstahl and BIBUS METALS and their subsidiaries, are international commercial enterprises. They serve the mechanical engineering and aerospace industries, the metalworking industry, construction and related trades, the chemical and food industry, medical technology, electronics and electrical engineering, environmental, gas and water management as well as the automotive and petroleum industry.

A comprehensive range of high quality products with professional, individual support as well as efficient logistics and warehousing are the bases for optimum market solutions in the interests of the customers. By commissioning the cut-to-length line, the company positions itself as a service centre. With this additional service, we can better meet the requirements of our customers for fixed formats. The cornerstones of this are diversity, experience and flexibility. Synergies are bundled to sustainably strengthen the long-term competitiveness of partners: Supporting Your Success.

SAUTER EDELSTAHL
Stainless high-grade steels
Aluminium
Fittings
Food fittings

Products
 Over 5,000 tonnes of aluminium and high-grade stainless steels – coils, sheets, tubes, bar steel, fittings and food fittings – in a wide range of qualities and designs, special profiles in stainless steel and aluminium alloys. Fixed formats in aluminium/stainless steel from cut-to-length line for formats of thickness 0.5 - 5 mm and max. width of 2000 mm

Logistics
 State-of-the-art steel/metals logistics centre on an area of approx. 15,000 m² with an integrated service centre. Customer orders are produced daily with fully automatic warehouse systems and delivered just-in-time with an efficient delivery service. Call-off orders and storage at the customer's request

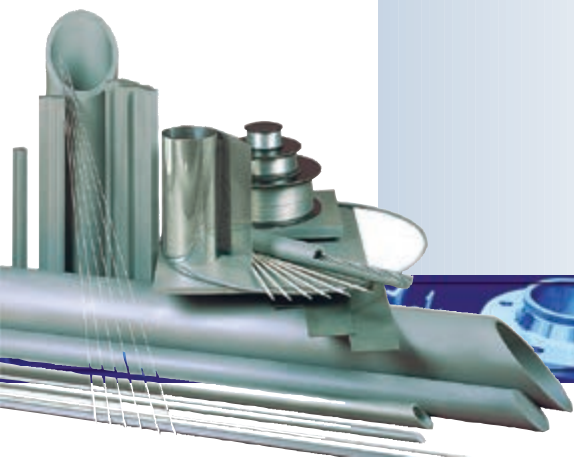

Service
 Fixed formats from our own cut-to-length line, cut-to-size with shears, restamping, certification, coating, grinding, brushing and polishing; comprehensive sawmill for precision and mitre cuts; special profiles as per customer's drawing

BIBUS METALS
S+D Spezialstahl
Titanium and nickel alloys
Zirconium
Tantalum
Welding material
Centrifugal casting
Duplex steels

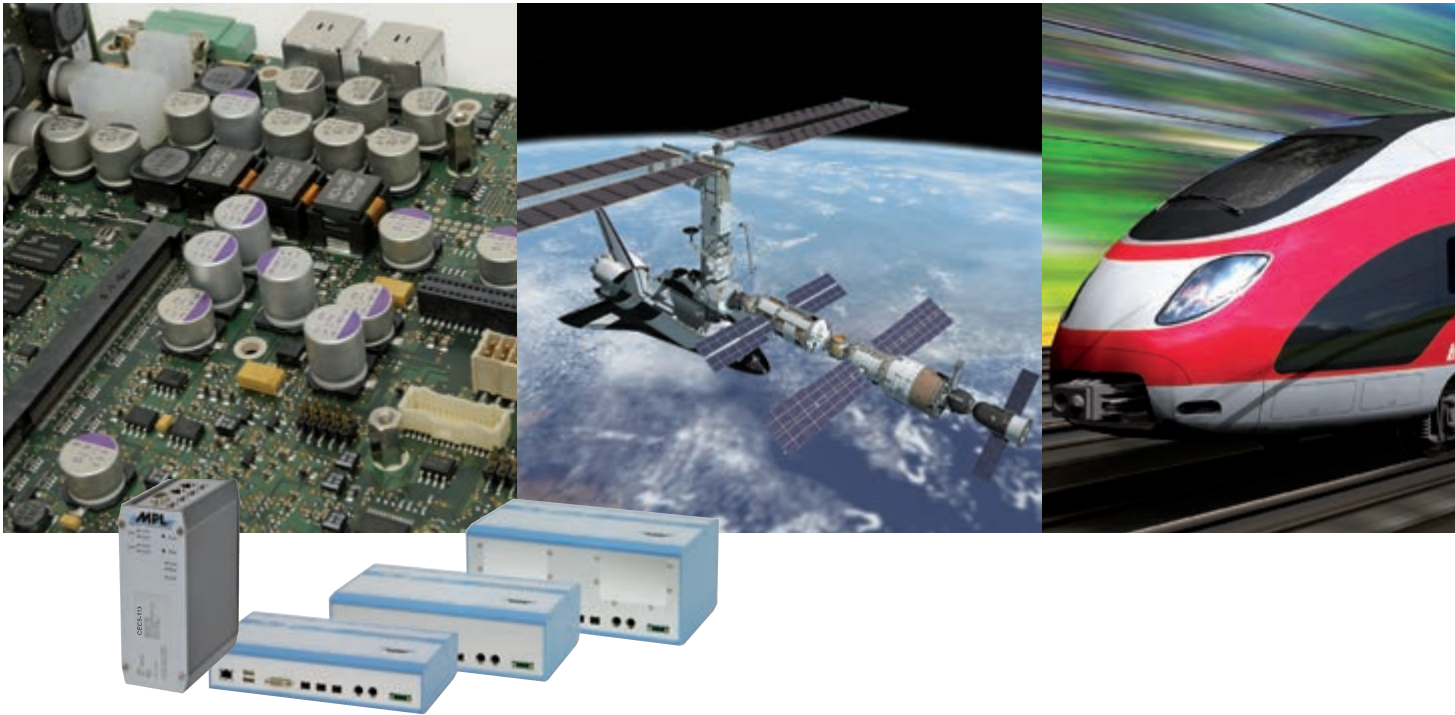

Warehousing of over 1000 tonnes of nickel alloys and titanium. Semi-finished products in the form of sheets/plates, strips, bars, tubes/pipes and fittings as well as welding materials

Production of components according to customers' drawings, welded constructions, turned parts and forged parts, compilation of complete packages for projects. Call-off orders, warehousing with Just-in-Time delivery

Cutting service, shearing, sawing, cutting by plasma/laser, cutting by water jet, forging, heat treatment, re-stamping

Electronics

Robust Computers, Displays & Electronics to meet the highest quality standards

***We strive to be your partner,
to imagine your requirements,
to understand and transform
them into an innovative and inte-
grated solution which increases
your efficiency. Our success is
based on a consistent portfolio of
reliable and robust electronics
focused on industrial needs.***

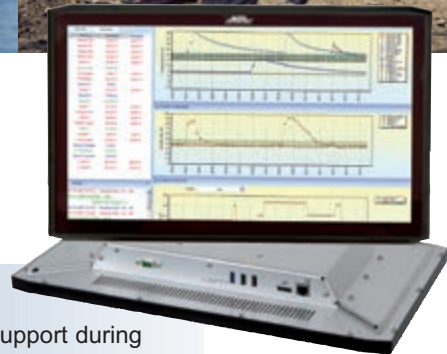

MPL AG develops and manufactures high-quality computers, systems and network products for all industrial requirements worldwide. The company's success story is based on the concept: lowest power consumption, extended temperature range and robust design. The solutions are innovative, offer guaranteed long-term availability, are fanless and thus low maintenance and unique. The products and solutions have proven their worth a thousand times over in practice and due to their high quality, are often used in the harshest industrial environments - but also in medical, transport and marine technology, in aviation, aerospace and defence technology - wherever a truly reliable product is needed.

The MPL AG also specializes in the development of drivers, the support and customization of BIOS, LINUX, Windows operating systems and network technologies.

MPI Technologies AG is a system provider and integrator of reliable hardware. For more than 25 years, the company has been providing electronic components, computing, networking and display solutions tailored to the needs of customers across a wide variety of industries. At the same time, the company places great value on supporting projects with the most demanding technical requirements as well as very price-sensitive applications.

If you are looking for ruggedized mobile devices, industrial PCs, Gateways, complete display solutions or power electronics, we are the right business partner.

MPL AG

Products

Robust fanless servers, industrial computers and systems with Intel and ARM processors, extremely flexible solutions which can be adapted with standard modules to any customer requirements. Versatile IP67 enclosures, DIN rail, flange, 19" rack or open frame as board solution.

Complete range of network products such as firewalls, switches, media converters. All products are 100% developed and produced by MPL in Switzerland

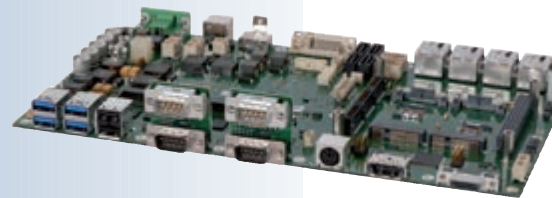

Engineering

Development of standard products for use under difficult conditions, semi-custom products (M-COTS) and customized solutions. Hard- and software development for client-specific applications

Know-how in analogue and digital designs, low-power and DSP designs, VHDL & ASIC developments. OEM and complete system solutions

Service

Software support during commissioning, training, repairs

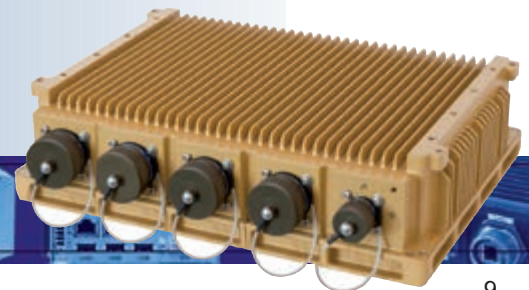

MPI Technologies AG

Industrial computers, servers, ruggedized tablets, network products, displays, storage products, electronic components

Development and design of system solutions based on standard products. The partners and products forming the basis of the customer-specific systems are evaluated with the greatest care.

Consulting, design, assembly, software support, testing, logistics
